**NuAct**

**Waupaca County Nutrition & Activity Coalition**

Support area organizations and programs that raise awareness and invite participation for healthier lifestyles.

Engage in physical activities that make children and families healthier.

Improve health through better nutritional choices.

---

**NuAct Vision**

is that our community environments will promote and support healthy lifestyles.

**NuAct Mission**

is to enhance the health of our children, families, and communities through improved nutritional choices and increased physical activities.

**NuAct Goals:**

- To increase individual knowledge and awareness about healthy lifestyles
- To implement and support healthy living opportunities and programs in our communities
- To encourage local partners to implement plans, action steps, and policy changes that create healthier systems
- To foster local networks and coalition membership, and to build capacity of partners that support healthy lifestyle efforts

**NuAct partners include:** American Cancer Society, CAP Services-Head Start, CHS Rec Center, Iola-Scandinavia Community Aquatic & Fitness Center, Marion Area Coalition for Healthy Communities, Manawa CARES, New London Medical Center, Park and Recreation Departments within Waupaca County, Raschke Chiropractic Center, Riverside Medical Center, School Districts of Clintonville, Iola/Scandinavia, Manawa, Marion, New London, Waupaca, Weyauwega-Fremont, Trinity Lutheran Church-Waupaca, UW-Extension, Waupaca County Libraries, Waupaca County DHHS, ThedaCare Physicians-Waupaca, Community Gardens of Waupaca, Weyauwega/Fremont, Clintonville, AmeriCorps, Calumet/Outagamie/Waupaca ADRC Consortium, Waupaca County Environmental Youth Connections

that support healthy lifestyle choices NuAct News; Professional Resource List; Wisconsin Worksite Wellness Kit and a variety of how to sheet / fact sheets,

**Waupaca County Nutrition and Activity Coalition**
was formed in May 2003 after childhood health, nutrition and inactivity surfaced as a major health concern in Waupaca County. In 2008 access to health care emerged as an additional priority. It is the belief of our coalition that the best way to approach these complex issues is to create environments that promote healthy eating and physically active lifestyles. Community collaboration and policy changes are essential to affect positive and sustainable change.

**NuAct Strategies include:**
- Targeting all community groups, at all ages, to develop good eating habits and active lifestyles
- Involving parents, caregivers, school and business as good role models for positive behavior change
- Involving education, healthcare, government, and industry from throughout the county who represent a broad range of backgrounds, expertise, and resources
- Utilizing a variety of approaches, since this is a complex problem with many causes
- Focusing on organizations that can make environmental changes, procedures and policies that promote healthier lifestyles

**Why NuAct now?**
Since 1990 the overall obesity rate in Wisconsin has more than doubled. 65% of adults, 25% of high school students, and 29% of 2-4 year olds in the WIC Program are overweight or obese. (1,2,3)

43% of Wisconsin adults & 63% of high school students do not meet physical activity recommendations

78% of Wisconsin adults and 82% of high school students do not consume fruit or vegetables 5 or more times/day

Obesity and inactivity are associated with the development of diabetes, heart disease and high blood pressure.

As of 2003 annual obesity related medical costs in Wisconsin were about $1.5 billion (4)

Waupaca County ranks 61 out of 73 for having no health insurance and 55 out of 73 for not receiving needed health care (low numbers indicate a better rank) (5)
